DETAILED ACTION

Response to Amendment

1. In response to the Office Action mailed July 28, 2004, applicant's submitted an amendment filed on October 19, 2004, in which the applicant's amended objected claim 20 to include limitations of allowed independent claims 1, 9 and 13. Rejected claims 18 and 19 were withdrawn herein in order to present them in a continuing application.

Allowable Subject Matter

2. **Claims 1-17 and 20** are allowed.

The following is a statement of reasons for allowance:

As for independent claims 1, 9, 13 and 20, they recite a method for generating a speech signal and communicating information from a transmitter to a receiver by receiving super-class information, fundamental frequency information and generating a speech spectrum. Prior art such as Unno et al. show these methods but fails to teach the recited method wherein super-class information (e.g. phoneme type)/fundamental frequency tuples are linked with LSF vectors, to obtain a LSF vector correlated with each of the tuples, for speech synthesis.

Dependent claims 2-8, 10-12 and 14-17 are allowed because they further limit their parent claims.

Conclusion
